This census has been transcribed from microfilm roll #T624-0317 from the National Archives of the United States. Some sections were very difficult to read and spellings were occasionally inaccurate. Some corrections have been made. The manuscript was checked and rechecked after transcriptions and after typing; however, since none of us are perfect, there may be errors or omissions. The researcher should bear in mind that a transcription is only a guide. Where a question exists, please refer to the original microfilm record.
